## **INTRODUCTION**

This report summarizes the 4<sup>th</sup> quarter activities at the hospital clinical areas in the year 2020. The report presents the indices of in-patient and out-patient activities according to age distribution, sex, place of residence and specialty. Bed utilization indices (Bed Occupancy Rate, Mean Duration of Stay and Bed Throughput); and Hospital Death Rate are expatiated.

The report further summarizes and presents the list of prioritized diseases classified as communicable and non-communicable, pattern of diseases in the out-patient facilities and immunization services (routine and non-routine vaccines) rendered in the quarter.

**Fig.1: Quarterly Comparison of In-patient Activities**

The in-patient activities in the fourth quarter 2020 were compared with the activities of the fourth quarter 2020 and the findings in the table 1 are as stated below:

- The total number of available beds in the hospital in the quarter was 880. Hence, no bed was lost due to closure. Meanwhile, the average daily beds occupied increased by 22.3%. It increases from 300 beds in the third quarter 2020 to 367 beds in the fourth quarter 2020.
- The total number of hospital admissions increases from 2,885 patients in the third quarter 2020 to 3,573 patients in the fourth quarter 2020. This marks an increase of 23.8%.
- The total number of hospital discharges increases from 2,551 patients in the third quarter 2020 to 3,292 patients in the fourth quarter 2020. Marking an increase of 29.0%.
- The total in-patient deaths recorded increases from 256 patients in the third quarter 2020 to 316 patients in the fourth quarter 2020. Also, the Hospital Death Rate (HDR) decreased by 0.4% from 9.1 per 100 patients in the third quarter 2020 to 8.7 per 100 patients in the fourth quarter 2020.
- The number of maternal deaths recorded decreased from 4 women in the third quarter, 2020 to 2 women in the fourth quarter 2020. This marks a decrease of 50.0%.
- The total number of infant deaths recorded in the third quarter 2020 was 4 and 50 was recorded in the fourth quarter 2020. This results to an increase of 1150.0%. Meanwhile, the number of neonatal deaths increased by 2.9%. it increases from 35 in the third quarter 2020 to 36 in the fourth quarter 2020. Also, the number of still-births increases from 21 to 31, marking an increase of 40.9%.
- The total number of live births recorded increases from 390 births in the third quarter 2020 to 427 births in the fourth quarter 2020; marking an increase of 9.5%. Consequently, the total births increased by 10.4%, that is; from 415 births in the third quarter 2020 to 458 births in the fourth quarter 2020.

### HOSPITAL BED STATE A

Table (3) below shows the number of Allocated Beds, Average Number of Available Beds, Average Number of Occupied Beds, Bed Occupancy Rate, Mean Length of Stay, Turn-over Interval and, Bed Turnover of the various departments (specialties) in the hospital. The table reveals that the specialty with the highest bed occupancy rate in the quarter was the Ophthalmology department, followed by the Gynaecology, Infectious Disease Unit, Special Care Baby Unit, Multi-Drug Resistance (TB), Orthopaedics & Trauma unit, and Surgery department. It further reveals that the specialty with the longest length of hospitalization was the Multi-Drug Resistance (TB) ward, followed by the Psychiatry, Plastic & Reconstructive Surgery unit, Orthopaedics & Trauma Surgery Unit, the Radiation Oncology, Surgery, and the Intensive Care Unit.
